

# PAINTED ALUMINUM COVERS

INNOVATIVE DESIGNS FOR EVERY TYPE OF GUTTER AND DEBRIS LOAD

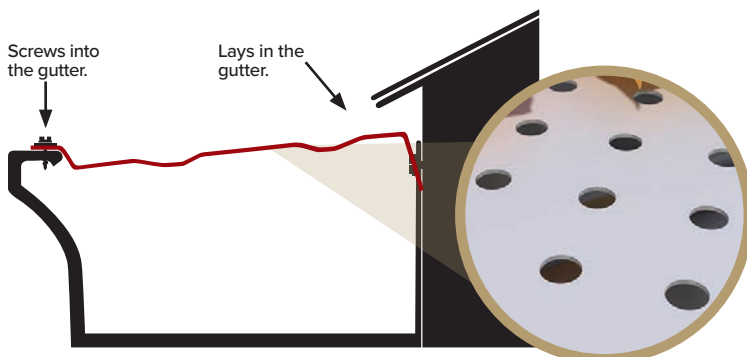

## E-Z-DUAL FLOW®

This effective and simple-to-install aluminum gutter guard recesses into the gutter and fastens to the front with stainless steel screws (provided). With thousands of holes, the rain water passes through the canals, making it E-Z for air flow to dry the debris and blow it away.

With an elevated rear, E-Z Dual Flow® slopes to the recessed front, for use with screw type hangers. Available in white, mill finish, and black, (which allows ice to melt quicker).

### E-Z TO INSTALL

**Lay E-Z-Dual Flow® in gutter and screw to front hem of gutter. After E-Z-Dual Flow® is screwed to the front gutter hem, the installer can screw through the cover in each hanger.** This helps reduce the chance of heavy snow or ice ripping the gutter hem or hanger.

### FEATURES

- Maximum debris load
- Fastens to the front with screws
- Heaviest water load
- Canals allow E-Z air flow, letting debris dry and blow away
- Solid perforated painted .019" aluminum
- Does not disturb shingles

**SIZE:** E-Z-Dual-Flow comes in 6 foot lengths and 5" or 6" widths.

### COLORS

White  
Mill Finish  
Black

Like all gutter protection products, depending on your debris type and load, E-Z-Dual Flow will require maintenance from time to time, by brushing off the top of the panels.
