

PREMIUM ALUMINUM SCREENS

INNOVATIVE DESIGNS FOR EVERY TYPE OF GUTTER AND DEBRIS LOAD

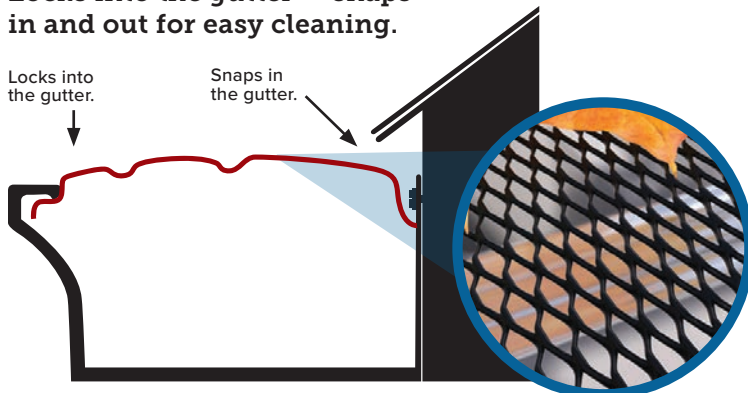

E-Z-MICRO MESH®

This micro-mesh powder-coated aluminum screen is great for extreme environments and coastal applications that can cause some competitive products to corrode, and keeps out even the smallest debris.

Designed with three 90° “steps” at the front for greater strength, this guard snaps into gutter hem, helping to force water to track into the gutter, while reducing the effects of water-streaks and tiger-striping across the gutter. The center beads also add strength, while helping keep water from surface tensioning across the screen. The angled back edge holds tight by locking into hidden gutter hangers.

E-Z TO INSTALL

Locks into the gutter — snaps in and out for easy cleaning.

FEATURES

- Heaviest debris loads with the smallest possible holes
- Locks into hidden hangers and does not disturb shingles
- Powder-coated micro-mesh aluminum
- Two center beads for added strength

SIZE: E-Z-Micro Mesh comes in 4 foot lengths and 5” or 6” widths.

COLORS

Black

Like all gutter protection products, depending on your debris type and load, E-Z-Micro Mesh will require maintenance from time to time, by brushing off the top of the panels.
